

tableeditdialog.h

```
graph BT; beo_timing_cpp[beo_timing.cpp] --> tableeditdialog_h[tableeditdialog.h]; debug_moc_tableeditdialog_cpp[debug/moc_tableeditdialog.cpp] --> tableeditdialog_h; tableeditdialog_cpp[tableeditdialog.cpp] --> tableeditdialog_h;
```

The diagram illustrates the relationship between a header file and three source files. At the top is a gray box labeled 'tableeditdialog.h'. Below it are three white boxes: 'beo\_timing.cpp' on the left, 'debug/moc\_tableeditdialog.cpp' in the center, and 'tableeditdialog.cpp' on the right. Blue arrows point from each of these three boxes up to the 'tableeditdialog.h' box, indicating that all three source files include or depend on this header file.

beo\_timing.cpp

debug/moc\_tableeditdialog.cpp

tableeditdialog.cpp
